Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

The abstract of the disclosure is objected to because it has not been presented in the proper domestic form. Correction is required. See MPEP § 608.01(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3, 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Linn et al (U.S. Patent No. 5,169,839) in view of Albers-Schonberg et al (U.S. Patent No. 4,310,519).

Linn et al disclose a closely analogous avermectin derivative having antiparasitic activity (see, for example, compound in column 2 wherein R6 represents a loweralkoxymethyl group). The only difference between the claimed compounds and the reference's compounds is that Linn et al excludes compounds wherein both R4 and

R5 are methyl groups. However, since avermectins having antiparasitic activity, wherein both R4 and R5 groups are methyl groups were well known in the art at the time the claimed invention was made as disclosed by Albers-Schonberg et al (column 25), it would have been prima facie obvious to a person having ordinary skill in the art at the time the claimed invention was made to modify the compounds disclosed by Linn et al in accordance with the teaching by Albers-Schonberg et al because such a person would have expected the resulting compounds to possess antiparasitic activity.

Applicant's arguments filed December 1, 2008 have been considered but are moot in view of the new ground(s) of rejection.

Claims 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 8.00-4.30.
